

EVA PROTECT

EVA FOAM WALL PROTECTION FOR VANS AND TRUCKS

Thanks to its high-quality EVA foam, the wall protection ensures a high level of safety for your horses during transport. They gently absorb blows in order to preserve their joints and protect the walls of your vehicles.

CLEANING INSTALLATION COMPOSITION

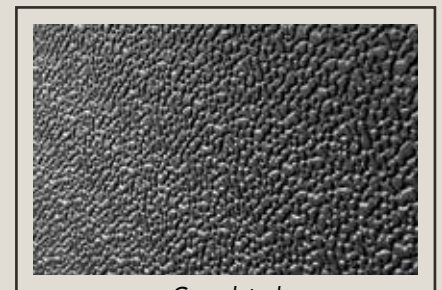

EVA foam.
Thickness: 15mm.
Density: 40 kg/m³

Flexible and light to adapt to the walls of vans and trucks.

Quick and easy installation.
Fix the wall protections using hinge screws on the edges and using a finishing aluminum profile on top.

Easy to cut.

The wall protections can be cleaned with a water jet.

Granulated surface
