## IDS GREEN

### SOIL STABILIZATION SLABS

Soil stabilization slabs and outdoor paths.  
Avoids the formation of ruts caused by the passage of horses and vehicles.

#### COMPOSITION

Polyethylene slab.  
Thickness: 40mm.

Resists the passage of machines  
up to 350 T/m<sup>2</sup>.

#### INSTALLATION

The stabilization grids easily fit together.

Then fill with the substrate of your choice  
(gravel, soil, sand, etc.)

#### CLEANING

Great resistance to bad weather, fire, frost  
and U.V.

Does not require any special cleaning.

Interlocking
